What's New in the Mail SenderExpress?

Mail SenderExpress is designed to be a professional high-speed e-mail sender program. Mail SenderExpress is ideal for newsletters, targeted marketing, and keeping in touch with clients. Because this mailer sends out mails in MX mode and works like a mail server, you don't need unreliable blind relays anymore. Mail SenderExpress also provides facility of adding an unsubscribe link to the receivers of the bulk mail. So, in case some of your targeted customers are not interested in receiving the mails from e-mail sender, they can just click on the unsubscribe link. One of the very important and the most unique feature of Mail SenderExpress is creation of emails using in-build Templates. This feature gives you the liberty of using one of eight eye-catching designer templates that are provided by Mail SenderExpress. You can upload your company logo and other images if you want in these e-mail templates. So, next time when you want to impress one of your difficult clients, just add creative touch of our templates to your email and enjoy the difference for yourself. As a multi-threaded application, Mail SenderExpress' normal sending speed can go up to 50,000 e-mails per hour. It also has a professional and simple user interface so that everyone can set it up in just a few minutes. Here are some key features of "Mail SenderExpress": ☑ Powerful direct sending ability. Sends without SMTP server, bypasses your ISP's mail server, automatically looks up recipient's e-mail exchange server and sends e-mail directly to recipients. ☑ Choose from the eight designer templates to add beauty to your e-mail. ☑ Very fast e-mail sender application based upon multi-threaded delivery. The normal sending speed can go up to 50,000 e-mails per hour. ☑ Very easy to send e-mail to lots of recipients. ☑ Supports multi-attachments. Both text and html formats are supported. ☑ Professional user interface, very easy to use, can be set up in few minutes Limitations: ☑ 10 uses trial #39; Mail SenderExpress #39; Mail SenderExpressAn outbreak of Salmonella typhimurium gastroenteritis associated with an undercooked hamburger. An outbreak of diarrheal illness related to an undercooked hamburger was identified at the
