ultra lingua 7.1.0.0.rar I understand that there are people on this forum who have never heard of such a language as Latin. But still, there may be those who want to. There are many sites on the net with translation into Latin of some languages of the world. I especially liked the site http://www.natahaus.ru/index/kuda_pozhalovat/0-86, but it has not been updated for a long time. On the net you will also find translations into Latin of sites in other languages. It's even more interesting. The translation is not perfect, but I think it's understandable.
