It's all over the news: Flynn had been cooperating with federal investigators and had been pleading guilty. Yesterday, he decided to go back on his plea deal. The FBI and Justice Department have two theories of why he broke his agreement. One involves his conduct on behalf of Turkish government lobbying, and the other involves anything he says now, in his new, bigger buck private capacity. Trump has already said he's turning on Flynn, and it appears the media is going to pounce on any new information. But Flynn was on to something when he was in Trump's ear regarding the Russia investigation. Not having read this, I'll just assume he meant the thought that a guilty man should keep his mouth shut, and go to prison quietly. For the better part of his career as a three-star general, Flynn was known as a loyal Republican soldier who could do no wrong. He served dutifully under an assortment of Republican presidents. He was made a general and, ultimately, a national security advisor, for the crime of taking a job that didn't exist yet. When he became President Trump's National Security Advisor, he was still another figure in the administration that was synonymous with loyalty. He often confided in The Washington Post that he was against the idea of firing James Comey, even after he became known to have broken the law in carrying on a public extramarital affair with a woman who was involved in an investigation. In retrospect, Flynn's break from the Trump-Flynn alliance was inevitable. He became too close to Russia and too cozy with Vladimir Putin. He got too cozy with his Turkish agent and Middle Eastern influence peddler, Turkish President Erdogan. True to

The shirt/final product is going to be a bit expensive for me. I would like to allow the user to give each shirt a favorite color. However, I can't seem to figure out how to allow the user to pick a favorite color via spinner selections. Using a drop-down list the user would be able to choose a favorite color. However, it doesn't seem like that's available. Does anyone know how I would go about this? Edit: To give an example, I would probably use a spinner for picking out the color(s) like so: Spinner s = new Spinner(this); s.setAdapter(new ArrayAdapter(this, android.R.layout.simple_spinner_dropdown_item, colors)); Where colors is an array of colors of the shirts, and I just need to figure out how to use the spinner "drop down list" to show that choices in my listview. A: A Spinner is for selection of items out of a fixed list.
