The ISO-2CD image file in this article supports a new AutoCAD 2020 with the latest update. This ISO image file has the same content as the CD, DVD-R, and USB flash drive versions. It can be used to upgrade the software on the computer, even if it's installed with a previous version. If you want to install the AutoCAD software on a new hard drive, it is recommended that you create an ISO image of the AutoCAD software before you install it. (For more information on creating a new hard drive installation, see "Upgrading AutoCAD from a Previous Version.") For more information on the ISO image, see "ISO."
