This season, Microsoft Studios' FIFA team traveled to Brazil as world-champion athletes and users to collect the first piece of data for the game. The data was captured on the Xbox One and analyzed by the team to develop the gameplay features you see today. New Gameplay Features and Improvements Two new one-off Skills (Hair Pull and Fake Shot) are now unlocked at the end of gameplay This year's FIFA game introduces a greater variety of one-off Skills (Hair Pull and Fake Shot) that can be used in the attacking and defending phases of gameplay. Both new Skills are unlocked by achieving enough goal-scoring opportunities during the course of a FIFA 22 game. Arena Spectator Experience New animations and camera angles for the 2015 FIFA World Cup Brazil™. This year's FIFA is as close to the experience of being at the game as possible. An all new commentary team called the "Anfield Dream Team" allows the world to hear the real voice of football, Neil Ashton, Sam Lee and Mark Little from the top of the stands at the stadium. The game features improved cut-scenes, such as "Goalline," an interactive cut-scene which allows for a 360° immersive experience of a goal-line showdown. Five additional playable stadiums, including Sao Paulo FC, Estadio da Amizade, Estadio São Caetano, Arena Corinthians and Estadio do Morumbi, are coming to FIFA 22. New Ways to Watch the Action New ways to watch the action at EA SPORTS™ FIFA 17 including the new Coliseum - a new home for the action, a 360° mode for high-def TVs and a new "Simulated" camera. With the introduction of the "Coliseum" mode in FIFA 17, all the action happens right there on the open-top screen. The stadium is truly alive with the sound and feel of a sports event, from the crowd, to the players and everything in between. The improved "Simulated" camera sees the action play out like it's on a high-def television instead of a compact HD screen. Just like the "Coliseum", the "Simulated" camera looks at a wide variety of angles, from the best of its positioning to the most detailed 3D view
