Trac-bzr. Download v 1.2.4.. Bug fix for OpenVZ upstart script to start on vz-init or upstart. stat,configdb,logrotate,msm-cache,nobinonly,pkg-lock,.Q: Codeigniter upload\_thread - Read CSV file and process lines I'm trying to upload a csv file via the Codeigniter Uploading from a CSV file feature. I want to show each line of the file as it's being uploaded and each time a line is uploaded, I want to execute a process. I've searched a bit and have found a simple CI example to upload a file, but it doesn't really accomplish what I'm looking for. Here's my current attempt: this is my test.php

```
Controller: class testing extends CI_Controller{ public function __construct() {
parent::__construct(); } public function index() { $config = Array( 'upload_path' =>
'uploads/', 'allowed_types' => 'csv,txt', 'overwrite' => true );
$this->load->library('upload', $config); if(!$this->upload->do_upload()) { $data =
array('error' => $this->upload->display_errors()); $this->load->view('upload_form',
$data); } else { $data = $this->upload->data(); $data['file_name'] =
$this->upload->data('file_name');
```
