You are John Mustache and you've been kidnapped and put into some sort of insane logic-free dreamland. You must take on the hordes of demons, golems, gorgons, giant spiders and sea monsters that you see before you in order to escape from this hellish place. As you fight off the baddies, you will find weapons scattered around that will make you stronger as you shoot your way through the odds. New weapons are unlocked as you progress through the main story, and you can collect armors and armorshelves you find as well. There's no gettin' out of the underworld without a little mustache trimming, so be sure to keep your'stache well-trimmed and ready to fight. Key Game Features: - Dense Boss Fights: Each boss has their own patterns and gameplay mechanics, offering up countless hours of story, weapon upgrades, and fun combos as you upgrade your arsenal. - Inventory System: You will collect a number of weapons, armors and armorshelves throughout your journey. You will unlock new weapons as you level up, and find new armors as you complete sets. - Diverse Environments: Many different environments will challenge you as you play. Each boss fight is a different puzzle that you solve in order to progress through the storyline. - Great Soundtrack: You're guaranteed to be pumped as you dive into the gorgeous hand-drawn animation, high-end quality soundtrack, and epic boss fights you will encounter on your way through hellish Abyss. - Restart From The Beginning: If you quit during the adventure, you can continue where you left off. You can even return and complete your game with a new mustache. If you just play the entire game one time through, you will unlock the secret playable character. - Parachute: You can find a parachute in the beginning of the game and use it at any point as you play to survive falls. You can fly over gaps, push off of things and pull yourself up to the top of cliffs. - Mustache Trimming: You can trim your mustache in order to level up to unlock new challenges, weapons, and secrets. A physics-based 3D platform game with lots of crashes, explosions and pipe-bending! Help intrepid adventurer Popples-a-lot to collect over 17 quirky characters and unlock their full potential! The game is presented in bright and colourful HD graphics, and features diverse world,

Download "Mustache in Hell" below: Download "Mustache in Hell" game here: After a couple of months of working on a game, I'm ready to share it with all of you. Look, I know I've been pretty vague about what I'm making and what it's called, but that's because it was... well, kind of a secret. When the dream came to me, I felt that I had to just take it and go with it, because my 3rd world politics and health are incompatible with corporate jobs. You know the thing about opening your mouth without having first checked your logical defences - a hard thing to accomplish in any case, but extremely easy in a situation where one does not dare to discuss what one is working on. I've pretty much been subconscious about my "secret" project ever since, but now I'm ready to talk about it. Quite frankly, I've come to the conclusion that while health does not allow me to make games in a corporate environment, it does allow me to work on something else at the same time, which is what I've been doing lately. So the game is coming along nicely, and I can't help but smile as I write these words. I've been a bit secretive so far because I wanted to make the experience right and the game perfect before I told anyone. I never thought I would release anything this early, so I'm really enjoying the process. As soon as I have some more beta testers and I'm really happy with the game, I will be happy to show off more details. Since everyone knows that I'm a big fan of roguelikes, I would like to hear what you guys think about the kind of games I would like to make. So keep in mind that I'm going to make a roguelike, but I have some very specific ideas about the genre. All these ideas came out of my fascination for the game "The Cave". I decided that I wanted to make a game with the same "feeling" of the original. The Cave did something special in its simple idea, and I'm always impressed by games that use the artistic and emotional

RSS feed (for articles)]]>Mustache in Hell seems like a tag-team outing of the PC gaming supergroup Hotline Miami.

Inspired by a conversation between me and an ex-girlfriend who told me she was boycotting/cutting out violent and sexual games, I tried two games to understand the presentation of violence as entertainment.

You play as a masked sniper who stalks a gang of street-smart brothers, executing each at once in different parts of town.

With an aesthetic that could only be described as a loose mash of the aesthetic from First-Person Shooter's and Action's games, Hotline Miami strives to give the illusion of brutality, but it's not necessary that your character can't

compromise himself and just shoot them in the face.

A simple and enjoyable first-person shooter.
