Brushes Brushes are the most-used type of tool in Photoshop. They're used to paint, erase, blur, and reveal hidden areas in images. There are several types of brushes, including standard brushes and special-effects brushes. Here are some of the most common brushes in Photoshop.

Brush Tip Shape Sketch or Graphics - This tip shape will not produce the results you're looking for. Standard Brush Sketch - This brush comes with an infinite number of variations, and is great for creating basic strokes. Squiggly - It's available in both Sketch and Graphic styles. This brush has just one setting, which is how much you want to curve the stroke. Freeform - This is a brush that lets you paint with whatever object you want. (You can add a number of images to it, then move the object around to any place on the canvas.) Expression - This brush mimics the look of a textured paintbrush. You can adjust the size and hardness of the brush itself as well as the strength of the fill. Special Brushes Sketch - This brush is similar to the standard Sketch brush, but you can use it to create shapes and designs. You can use it to create any style of line. Gouache - Like the Sketch brush, this one produces lines of various thicknesses. And like the Sketch brush, you can adjust the stroke. Draw - You can easily draw the first line of a shape or the base of an object. Smart Brush - It's a combination of several brushes, including the Sketch brush, the Expression brush, and the Brush Tip Shape brush. You can adjust the size of the brush and the fill size (how much the line itself fills the space). This is a very useful brush, and you can find it in the Filter/Artistic/Smart Brushes folder. Gradient - You can adjust the color of the stroke, which is great for adding shading and highlights. This brush comes with a large selection of colors and preset patterns for you to choose from. Artistic - This brush contains two brushes. The first brush produces a round area of any size. The second brush produces a line of any thickness. You can use these two brushes to create circles, arrows, and arrows with various styles. Paint Paint can be a

"Flicking you off was not offensive to the First Amendment," U.S. District Judge Paul Engelmayer declared at the conclusion of the eight-minute video, which a young woman had uploaded to YouTube and which she had streamed to the courtroom. "The Constitution does not forbid it." The argument was part of a four-hour hearing in the case of Terry Bollea, better known by his stage name "Dwayne Johnson," who is trying to win a permanent injunction to remove an adult-themed clip from YouTube. In the clip, Mr. Johnson—a onetime wrestler who plays superheroes in movies like "R.I.P.D." and "Furious 7"—is seen nude in bed with the adult film actress Stoya (whose real name is Angela White). Their embrace occurs just as they are speaking with one another in what appears to be a video chat, but the face of the woman, which was filmed by a concealed camera, remains partially obscured. At the heart of the case is the question of whether Mr. Johnson's rights as a public figure were violated when a user of YouTube, Inc., posted the video to the website without his consent. The video is four minutes and 51 seconds long. The woman who uploaded it is a bot. In an order issued Friday, Judge Engelmayer said the

video is “clearly of adult, even pornographic, nature.” The judge also said that the video was posted in violation of YouTube’s policies, or community guidelines, “a breach of YouTube’s terms of service,” but that it didn’t violate the Digital Millennium Copyright Act. “I don’t even know if he was flicked off,” the judge said, referring to Mr. Johnson, as the woman who streamed the video spoke on his behalf. “All I know is this was a mechanical problem.” As for the record-breaking views the video has drawn? The judge said that’s not relevant either. Mr. Johnson, 43, is asking the court to block “Flipped Out,” so that he can prevail at trial on the issue of whether a jury should decide the case, which he says is a personal matter. Creation of fibroblast growth factor 7 and fibroblast growth factor 8 from epit
