Trim Optimum model lift = 1.6 pounds. $9 = 2.0560$ at $74^* F$. $V = 7.15$ feet per second.
 $Cr = 1.75$ Survey Destroyer: One of the Best Sea Creature Surveys in the World by Martin Jones 1. Introduction The survey destroyer, also called an "air/sea killer" for its ability to make ships and ships move to the bottom of the ocean, has been around for over 40 years. In recent years however, the more modern survey destroyer has become the

survey standard, and the traditional survey destroyer is fast becoming a relic. This survey destroyer is named the Survey Destroyer V2 for 2002. Survey Destroyer V2.1. Survey Destroyer V2.1 The Survey Destroyer V2.1(Figure1) is similar to the Survey Destroyer V2 in that it uses a V-shaped hull. The major difference is that the hull of the V2 is made of lightweight wire mesh. As a result the V2 does not have as much downward thrust for it's size and it is not as fast as the V2, but it is much lighter. Weighing in at just 7.5 pounds, the V2 can be towed at up to 2.0 ft/sec and can execute 3.0 ft/sec turns at a speed of 7.0 ft/sec. The V2 typically reaches the ship/ship area in one to three hours. The Survey Destroyer V2.1 has a maximum velocity of 4.5 ft/sec and can execute 1.0 foot/sec rolls with a revolution of 2.0. The V2 is more maneuverable than the V2 in that the thrust is more central and it can turn better on a dime. Like the V2, the V2.1 is a core vessel, or a totally silent vessel. V2.1 Specifications Length: 33 inches Draft: 8 inches Width: 21 inches Depth: 12 inches Displacement: 7.5

lbs Weight: 7.5 lbs Characteristics When towing a ship, the V2.1 acts as a conventional torpedo with a range of 15 feet and a speed of 15 ft/sec. When it is loaded as a survey vessel, the V2.1 has the same performance as the survey destroyer.

Vehicle Features The V2.1 has a maximum speed of 4.5 ft/sec but can execute 1
