Threats: Book: Email: (Address not published) Chat: Tweet about this Podcast Listen to this Episode on iTunes or For this week's podcast Chris and I played several games of Chess including an interesting game I picked up at the World Open in Santa Monica. This one game has become a major topic of discussion between me and the great master Botvinnik. This game tells the true story of the competition between Botvinnik and Tal, and will eventually be part of Botvinnik's first published book (along with the game that I studied with him). I also review some of my own experience as I prepare to travel to Russia next month to play in the World Chess Tournament of the Americas. Feel free to share any feedback about this episode with me via email, Twitter, or any other social media. I would love to hear what you think about this episode of the podcast. Here's some of the interesting news that happened around Chess in the last week: Russell Gallagher Tweet: "Botvinnik and Tal - a historic rivalry" Karpov and Kasparov - Chess Circuit Final WCA Tournament in Santa Monica, CA Euwe, Portisch, and Reshevsky making a chess festival in Antwerp, Belgium Chess Academies

Eagle-eyed fans of the very early days of Bully (on Linux) may have noticed that they didn't have access to all of the soundtracks, full of cowbells and... video game culture. Luckily the Dark Horse folks are listening and have taken some time to help me out with a little scoping for the people in need. Watch this space, devs, for more details! A unique, historical military game. An interactive, turn-based system of operations. Long-term battles with a variety of gaming options: from independent armies to operations of the Red Army, from battles on land to naval actions, from battles on the sea to their airborne versions. Pick the battles with the greatest importance for your game, choose your players and units. An economy system of the game allows to participate in real war according to plans of the Armed Forces and use units of your own. The Tale of Stalingrad first introduced gamers to a battle that still resonates through history, and brought fans around the world back to the epic conflict. Now the game is back in a new edition, and we are incredibly happy to let you know it is being built from the ground up, and will feature all of the features that you love about the original game, but new and improved. We want to make sure you have the ability to enjoy the game to its fullest, and that you are able to turn every month of your life into a dreary, blitzkrieg of tank battles. Thank you so much for your patience, and we can't wait to have you play! Our team is working overtime to get this game ready for launch, but for now, we wanted to give you a little taste of what we have been working on, and here is a video of the game in it's current state... Yes, it is true, I have returned! I remember it is a very simple game, but the simplicity did not make the game 'trivial'. Those who were able to utilize their tanks properly and in the right battles were able to have a great impact on the game. This is a quickie for today. I want to send a massive thank you to Master Soviet Armour, and their team! They have been amazingly fast and efficient, and their work has helped immensely to bring the game to where it is today. I am excited that the game will be 100% finished before I leave for Thanksgiving, and I am sure that the final product will be amazing. I have one thing I am trying to accomplish with this is release it on the same day as the 10th anniversary of 'The Day of the battle of Stalingrad' as the anniversary date for this year in the USSR. Thanks for your support, and know that your help has enabled me to accomplish so much. I do not know when the day will c9d1549cdd

Den 15 december berättade vi att restaurang Högberga i Kista i Tvååker hade blivit uthyrd av en temaholic. Han hade spenderat flera tusen kronor under ett par år, och varit arg över att det saknades läkemedel. Därav berättelsen. Men nu vill Kalle Hammarqvist, som skrivit den, berätta att han inte gjorde det alls. Han ville bara "påverka en del av invånarna i Tvååker för en mer brottsfrisk man (helt formellt uppdraget som kombinerats med uppdraget om att förblinda "gråtungen miljö", högavlönad satiriker Kalle Hammarqvist). Zero G Arena is a free-to-play arena shooter. It uses a player-made framework to make it easy to build gameplay modes and add content. Zero G Arena itself, however, was created by a small group of people at the University of Waterloo. Zero G Arena features advanced physics, smooth animation and ragdoll effects. You can build your own game modes to play with friends and strangers, and collaborate with other players to build maps and modes. Zero G Arena features both competitive and casual game modes, as well as bots that can play against other bots. Zero G Arena features a 3D engine, where everything is drawn at native resolution, and can be scaled. Zero G Arena features both a unique game camera and a perspective changer, which allows for a simple way to create levels, where you can easily twist and turn your views. This also provides a variety of play styles, by just tweaking the settings of the camera and your controls. Zero G Arena features tools to customize your loadout. The game includes a modifier bar (which allows you to switch between different 'classes' of weapons), and includes support for both the Steam Workshop and ESFI that will auto-add mods from the workshop into your loadout if they are found. Zero G Arena features a configuration file that is loaded from your Steam Cloud. This allows for you to have all your settings and what-not keep up to date even if you change computers or are playing offline. Zero G Arena features multiple different themes, which can be enabled and disabled in-game (the included Steam Beta themes do not work with the game in its final release state). Zero G Arena features a multi-string animation system, which allows you to animate your characters, weapons, and projectiles. You can toggle between quick or slow animations to keep game feel fast-paced, or low-animation to simulate some sort of long-range tactics and strategy. This is a feature that can be turned on or off, and its effects are cleaned up after it is off. Zero G Arena features a number of sound effects. A mixer system allows you to alter the audio to fit your needs. A soundset can be loaded from the Steam workshop {which, ironically, some of the included ones are broken} and includes options for many different types of sounds, with the ability to mix them as well. About the Team Behind Zero G Arena: Zero G Arena was developed by the University of Waterloo, an amazing group of people
