In November 2008, Autodesk introduced AutoCAD Activation Code (version 2009 and 2010) to support the ISO 1101:2007 standard for native CAD, which supersedes DIN 14124. According to Autodesk: "The use of ISO standards allows CAD to become more intuitive to the user, as all CAD programs would become more akin to "virtual drafting tables". AutoCAD Torrent Download 2009 and 2010 was the first product in the Autodesk Vector Product line to use the standard". In 2009, Autodesk also introduced a more accessible version of AutoCAD. AutoCAD 2011 also marked the introduction of "3D Data View", which allows the user to explore the design of a model as they work on the model itself. Version history In 2007, Autodesk introduced a new version of AutoCAD every six months. Version 2006 was the first version to include a "wildcard", which gives users the ability to search for files of any name. This was not adopted as Autodesk favoured a new naming convention. With each new release, the previous version is still supported, either by maintenance of the older files, or automatically migrated to the new version if the user did not change the default settings. This makes it possible for users to move all their work to a new version without any loss of work. The program also continues to provide support for the legacy *.ARC format. However, this may change in

the future with Autodesk having ceased support for this format. Version 2016 Release date January 16, 2016 New features and changes Updates C++ library for 64-bit C++ compilers 3D support using standard 3D model formats (OBJ, X3D, LWO, 3DS, KHR) Change in naming convention (all previous versions were named with year_month_day). New Productivity Tools for X, Y, Z Workspaces for X, Y, Z Office Tools Performance enhancements Support for Industry Foundation Classes (IFC) Support for STEP in Dynamo support for incremental import/export Support for AutoCAD RT support for document exchange formats Increased UUID length (guaranteed to be 16 bytes) Support for TrueType Fonts Support for SmartDraw Support for Enterprise Project Management (EPM) BIM 360 Warehouse in both Web-based and Desktop based modes.
