This information is also used to enhance gameplay, while simulation technologies are used to provide a completely authentic feel. This technology makes it possible to control players as if they were in the real world. HyperMotion provides an effective way to gain an inside and realistic view of players, giving a manager a true understanding of his team in a way never before possible. The most important thing here is to make sure FIFA's insides are spectacular. We are developing extremely complex algorithms to track player movements in motion-capture suits, so that we can incorporate the best movement data from real-life players. We are constantly trying to make a game that players want to play. The In-Arena Visuals (With the FIFA 20 engine, we used the goal structures, but this year, with the HyperMotion engine, we have created a goal. For the first time, virtual spectators are popping up to provide an authentic stadium experience, while the pitch is projected right in the player's view. This is a big step forward.) To create even more realistic in-game visuals, this year FIFA uses the game engine's power to create the pitch and stadium environment around the players' perspective. We took the stadium set we used for FIFA 20, but now we have enhanced this with greater definition, meaning that it is more detailed and packed with in-game visual effects (i.e. graphics and crowds). We've also increased the scale of the stadium environment, so that for the first time the stadium actually grows from the player's perspective inside the penalty area. Alongside this, stadium bleachers, advertising boards and numerous stadium structures have been inserted all over the pitch and stadium. The PITCH The Pitch has been brought alive with ESPN Real Player Motion Technology, which includes an in-game broadcast for all 72 matches. ESPN Real Player technology combines the depth of the player's view with unprecedented clarity to bring the best of both worlds and an experience never before seen in the history of football. The new Pitch have been populated by over 600 live crowd animations, interacting with players and crowding around the pitch. Further detail and life has been added to the pitch, with more life being added to the scenery and the grass making it feel more like the real thing. In previous years, we have created a goal at the FIFA 19 engine. This year, we have created a goal, while virtual spectators are popping up

EA SPORTS FIFA is the best-selling football video game franchise of all time, with over 1.2 billion played. The world's leading football (soccer) game features gameplay innovations, deepened, authentic football play, new clubs and player licenses, and expanded gameplay modes. The FIFA experience is about players, club management, authentic football gameplay and rivalry. What is FIFA Mobile? EA SPORTS FIFA Mobile is the all-new soccer game from EA SPORTS for mobile and is available now for iOS and Android. Did you know? The Football Association is an independent, membership based organisation with the stated aim of "ensuring and promoting the highest standards of football and representing football at home and overseas". Their view, shared by FIFA, is that football is the most popular and played sport in the world and is the leading sport in the UK. I have played FIFA on xbox 360, mobile, pc, ps3 and ps4. I can say I havn't bought anything else from fifa ever, so when fifa came out on xbox and the wii with the reduced field of view I was eager to give it a go. That was 10 yrs ago and for me it was just what I thought it would be. Well, it does what it says on the tin and there is plenty to do. But, it does have a few ffoxes. The first thing you will notice is the netCake thingy they call wii on the screen. It is annoying really as you have to have to get up each time you want to move your character to look at the screen. The same goes for the ps4 and xbox, you have to have to flip screen each time you want to move your players. The next is the lack of new players. You can get players through arcade and you have a league shop, which is a big plus, but you can't buy actual players. There are plenty of leagues to choose from, but there is nothing new on the store like the classic 'old school' league that I played on the xbox. Graphics, the are a mixed bag but the matchday editor is great, you get to run your own press conferences, arrange your bench and alter your tactics. But you are stuck with the same visual style that was on the previous game. My final complaint is the career mode. There is nothing in it to play for money, you bc9d6d6daa
