TURBOWIN.A Missing Link in the Study of the Platelet in SCA: Critical Questions for the Translation to Development of New Pharmaceuticals. Autosomal dominant polycystic kidney disease (ADPKD) is a life-threatening disease characterized by the development of renal cysts and biliary ductal dilation. There are no effective medical therapies for ADPKD, but it is possible to slow its progression by inhibiting cyst growth, notably by blocking the vasopressin V2 receptor. Several compounds have been shown to slow cyst enlargement in murine models. VDA-044 (vav-derived autocamtide-2 related peptide analog) is one such candidate. Clinical trials are underway to assess the safety and clinical efficacy of this drug, but recent mouse studies suggest that the drug may be less efficient than expected in blocking cyst growth. Here, we present evidence for the need to understand more about the cellular and molecular mechanisms underlying cyst growth in animal models, and specifically how this relates to the disease in humans, before conclusions about the efficacy of a new drug, not currently approved in humans, can be drawn. Gemini, a cryptocurrency exchange founded in 2013 and primarily focused on Ethereum, has listed BitForex as its new option for buying/selling the leading stablecoin USD Coin (USDC), that manages to be both a stablecoin and a cryptocurrency. BitForex is a platform that supports trading of more than 20 cryptocurrencies. On the platform, it has 2 trading pairs with Bitcoin and Ethereum. The support of USDC shows that Gemini may be interested in adding more digital currencies on its platform. Gemini has added BitForex to ensure its traders can now seamlessly buy and sell USDC. Trader: This is a major milestone as it completes the stablecoin gateway to enable USD Coin transactions. Gemini has demonstrated a keen interest in digital currency adoption by supporting two of
