HIVE is an arcade game where you fly in a spaceship collecting stars. As you collect a star an entity from subspace appears and starts to chase the ship. Keep on collecting stars, more entities appear and follows the first entity, creating a longer and longer tail that upon collision with the ship will destroy it. Goal of the game is to avoid the tail for as long as possible while collecting stars. Power-ups: Move: Increase the speed of the ship. Shield: Destroys an entity if collided with. Gravity: Makes the ship fall down and can create gaps between entities. Stars: Generate 4 additional stars. HiveP provides an AI that will drive for you. But using stars and power-ups will greatly increase the speed of the game and provides better player experience. Additional issues: If you play in 2D mode, the game will behave like a space shooter. But in 3D mode, the game behaves like a top down shooter. You can change the mode by pressing the Esc key on your keyboard.
