Contents Overview AutoCAD is a computer-aided design (CAD) software application used by architects, engineers, and others who design in three dimensions. AutoCAD was originally developed by Dave Jones of Autodesk. In 1990, AutoCAD was ported to the MIPS architecture. That port was not compatible with the x86 version, and the last version with support for the x86 architecture was released in 1994. AutoCAD is available as a stand-alone application for Windows, Windows CE, macOS, Linux, Android, iOS and other Unix operating systems. Development and licensing AutoCAD is a commercial application, and is distributed with a variety of optional features. Things have just gotten worse for Michael Cohen, President Donald Trump's former personal lawyer and longtime fixer, who was forced into an appearance on Capitol Hill on Wednesday. After being questioned by two House committees about the president's alleged hush-money payments and other matters, Cohen's appearances before the House Oversight and Reform Committee and the House Intelligence Committee were abruptly canceled. In a text message to The Hill, Cohen's attorney said that, "Michael was advised by his personal attorney and the personal attorney for the committee to assert his rights under the 5th amendment and not answer any questions. He was further advised that he did not need to answer any questions that might tend to incriminate him." TRENDING: Alan Dershowitz sues CNN to halt 'malicious' attacks on innocent people It's not clear what has happened to Cohen since then. Formerly an influential player in Republican circles, Cohen has now become a convicted felon and is on trial for tax fraud, bank fraud and campaign finance violations. On Friday, Cohen told reporters that he had "more evidence" to provide Congress. But he also told Reuters that the upcoming trial in Manhattan federal court is likely to "change the dynamics of the matter." What's next for Cohen? Cohen could remain on Capitol Hill or return to his home in New York City. "I'm not really concerned, to be honest with you," Rep. Peter King told The Hill. "I think the answer is up to him. I know he wants to do the right thing. I don't know what's going on behind the scenes. I don't really care.... I really don't." When told by The Hill that Cohen's case could be a concern for some committee members, King said: "That's really something that's up to him. I really don't care." Both Republican and Democratic sources told the outlet that Cohen's appearances were canceled because of concerns that his answers could be used against him in his upcoming trial. A source told The Hill that Cohen's attorneys told committee members that Cohen could not answer their questions because they could be used
