Romancing Saga Minstrel Song.iso Download.The novel 21-kDa adipose tissue-derived stromal cell protein VAP-1. A novel 21-kDa protein (designated VAP-1) was identified in conditioned medium from rat adipose tissue cultures. Gel filtration chromatography, amino acid sequencing, and mass spectrometry identified the precursor of VAP-1 as pro-matrix metalloproteinase-2 (pro-MMP-2). Using the immunofluorescence staining technique, VAP-1 was shown to be expressed in large perinuclear granular structures. Following incubation with fibronectin or laminin, VAP-1 colocalized with the processed furin (T2) domain of the pro-MMP-2 precursor, suggesting that VAP-1 may play a role in the proteolytic activation of pro-MMP-2. The presence of VAP-1 in adipose tissue, perinuclear granular structures, and conditioned medium all suggest that VAP-1 is a novel, stromal cell-derived adipokine that may regulate the extracellular proteolysis of adipose tissue and contribute to insulin-stimulated glucose transport in adipocytes.Potentiation of taxol cytotoxicity by beta-lapachone in taxol-resistant MDR human tumor cell lines. To improve the efficacy of cancer chemotherapy, a second-line drug has been used to reduce the development of resistance to a first-line drug. Beta-lapachone (beta-L), a quinone c6a93da74d
