

islamic law regulates many aspects of a woman's life, including when she can, and cannot, get married, where she lives, and what she wears. breastfeeding is not a religious practice, but islamic law does mention it, and includes detailed guidelines on when, where, how and how much a woman can breastfeed her baby. the quran states that a muslim woman can only breastfeed her baby for riyadah, which is defined as "a small number" of days (1:139). the quran also mentions that a woman is not obligated to breastfeed if she is pregnant (2:233). after birth, the mother must not feed the child with food that her own body has produced (2:233), and any milk that is produced in excess of what is needed for the baby must be discarded (2:233). despite the clear guidance on breastfeeding that is part of islamic law, cultural and local customs are often more important than religious guidance in the daily lives of many muslim women. for example, many muslim mothers would prefer to breastfeed their baby as soon as he or she is born, regardless of the exact timing of when a woman reaches the end of her pregnancy. one challenge that many muslim mothers face is understanding islamic law on breastfeeding, and knowing that their religion requires them to breastfeed. if they are not aware of the legal requirements on breastfeeding, they may not provide their baby with the right nutrition. according to the muslim association of great britain, "one of the most frequent questions that we hear from muslim women is: 'when can i start breastfeeding?' it's a question they have probably been asking themselves for some time. but they are often not aware of what they're actually allowed to do."2

## Islamic Jurisprudence Book In Urdu Pdf 12

as of June 2018, its media channels had released several videos documenting its operations in Afghanistan, including one in October 2017 claiming to show the Islamic State fighters in Nangarhar province. However, the organization is not yet well-established in Afghanistan, and its ability to expand its presence in the country is contingent on a large influx of foreign fighters, resources, and the support of the Taliban or other Afghan insurgent groups. There is little evidence that foreign fighters have flocked to Afghanistan in large numbers, particularly from Europe, which is where a majority of fighters arriving from elsewhere in the world originate. In the years following the collapse of the Taliban regime in the wake of the American invasion of Afghanistan in 2001, the Afghan Taliban made efforts to create a state-like society under the guidance of their ideological leader, Mullah Omar, a scholar from the Naqshbandi sect of Islam. Naqshbandi is a school of Islamic jurisprudence developed in Central Asia in the 13th century, although its practice was not always peaceful. Although its adherents openly proclaim themselves as the only true Muslim<sup>15</sup>, the Naqshbandi is well known for its more violent and intolerant interpretations of Islam, particularly during the 14th and 15th century. As the Taliban regime came to an end in late 2001, the Taliban insurgency in Afghanistan was driven by the ideology of Naqshbandi and the tenets of the Sharia ideology. During the Afghan civil war from 1992 to 2001, the Taliban ruled most of Afghanistan and their rule was supported by a large number of Afghan mullahs. A large number of Afghan Taliban were also among the signatories of the Sharia fatwa in 2001, a fatwa that called for global jihad against the United States and its allies. 5ec8ef588b
